RSC BIO SOLUTIONS HEADS TO 2013 WORK TRUCK SHOW

Manufacturer of Biobased Cleaners, Degreasers, and Lubricants Showcases Innovative Hydraulic Fluids at Show

CHARLOTTE, N.C. (March 4, 2012) – [RSC Bio Solutions](http://www.rscbio.com), the leader in manufacturing and distributing non-hazardous, biobased cleaning, degreasing and lubricating products for the work truck industry, is heading to The Work Truck Show, March 6-8, in Indianapolis to exhibit its ENVIROLOGIC® 3000 Hydraulic Series at Booth #5468. Uniquely suited for work trucks, the ENVIROLOGIC® 3000 Series is a high performance line of readily biodegradable, non-hazardous hydraulic fluids.

These products can perform in extreme high temperatures (250°F), low temperatures (-40°F), and high pressure (5000+ psi) applications. Formulated from biodegradable non-toxic base stocks that afford exceptional oxidation and thermal properties, ENVIROLOGIC® 3000 Series products are ideal for mobile hydraulic systems operating in environmentally sensitive areas. They exhibit enhanced wear protection, cleanliness, and longer life than conventional petroleum hydraulic oils, as they meet ISO and SAE grade specifications. ENVIROLOGIC® 3000 Series products are direct replacements for a broad range of ISO / SAE grades of petroleum oil based hydraulic fluids, and have reduced environmental impact in the event of a leak or spill.

“The ENVIROLOGIC® 3000 Series demonstrates a compelling example of how our readily biodegradable advanced technology can deliver real value in terms of enhanced safety and risk reduction without giving up anything in terms of performance. Work truck operators don’t have to choose between high performance and environmental safety: we can deliver both,” said Mike Guggenheimer, Vice President of Business Development for RSC Bio Solutions. “We’re thrilled to be attending Work Truck Show again this year to showcase these unique benefits of our ENVIROLOGIC® products.”

RSC Bio Solutions will also be exhibiting its line of readily biodegradable, high performance truck and equipment care concentrates and ready to use formulated cleaners trademarked SAFECARE® and GUNK® powered by SAFECARE®. The product line includes a Truck and Equipment Wash, Heavy Duty Degreaser, Universal Parts Washing Fluid, and a General Purpose Cleaner and Degreaser.
