**RSC BIO SOLUTIONS' EAL EARNS ADDITIONAL AEGIR-MARINE  
APPROVAL**

*EnviroLogic® 802 Approved for Use in PRIME Rudderstock Seals*

**Charlotte, N.C. (March 9, 2015)** – RSC Bio Solutions, a global leader in readily biodegradable cleaners, degreasers and functional fluids, has announced that its EnviroLogic® 802 environmentally acceptable grease has met the stringent requirements for approved use in AEGIR-Marine PRIME rudderstock seals. This approval is an extension of the existing partnership agreement between AEGIR-Marine and RSC Bio Solutions intended to increase the availability of VGP-approved environmentally acceptable lubricants (EALs) for steering systems, stern tube seals and other marine applications.

EnviroLogic® 802 grease has been evaluated by independent laboratories to meet the U.S. Environmental Protection Agency (EPA) definitions of biodegradable, minimally toxic and not bioaccumulative. RSC Bio Solutions, therefore, certifies its EnviroLogic® 802 grease as 2013 U.S. EPA Vessel General Permit (VGP) compliant. The product is formulated to possess strong oxidative stability, corrosion protection, and EP/antiwear protection, as well as excellent dropping point, water resistance, and structure stability over an extremely wide range of temperatures.

Other RSC Bio Solutions products approved for use by AEGIR-Marine include EnviroLogic® 3068 and EnviroLogic® 3100 readily biodegradable hydraulic fluids.

“AEGIR-Marine is recognized internationally for its dedication to quality and service,” said Mike Guggenheimer, president and CEO, RSC Bio Solutions. “Having another product approved for use with their equipment speaks not only to the extreme interest in sustainability in marine operations, but to the superior performance of our environmentally acceptable lubricants.”

**About RSC Bio Solutions, LLC**

Established in 2010 and headquartered in North Carolina, RSC Bio Solutions is an affiliate of RSC Chemical Solutions and is focused on providing high performance chemistries that are safer, non-hazardous and environmentally responsible. To expand its offerings further, RSC Bio Solutions' parent company, Blumenthal Holdings, recently acquired a controlling interest in an 18-year-old company, Terresolve Technologies, Ltd., and its EnviroLogic® product lines, including readily biodegradable functional fluids and oils that are tested and proven in some of the toughest environments possible.
