**TERRESOLVE TECHNOLOGIES AND RSC BIO SOLUTIONS JOIN FORCES TO  
BRING READILY BIODEGRADABLE CLEANING SOLUTIONS TO THE MARINE  
AND OFFSHORE INDUSTRIES**

*Leading Green Lubricants Manufacturer Expands Offering with Proven Cleaners, Degreasers  
and Solvents from RSC Bio Solutions*

**Mentor, Ohio, March 11, 2013** – [Terresolve Technologies](#), a global leader in environmentally safe fluid technology, in collaboration with [RSC Bio Solutions](#), the leader in safe cleaners and degreasers, announced that it now offers the proven SAFECARE® brand cleaning and degreasing solutions for the marine and offshore industries. Uniquely suited for offshore drilling operations, as well as marine transport and construction equipment, SAFECARE® is a comprehensive line of powerful, readily biodegradable cleaners, degreasers and solvents.

The announcement comes at a critical time in the marine and offshore industries. Later this month, the Environmental Protection Agency (EPA) is expected to accept a new draft of the [Vessel General Permit](#) (VGP), a set of specific rules and regulations that dictates acceptable types and levels of vessel discharges. In addition to requiring environmentally acceptable lubricants in oil-to-sea interfaces, the new VGP draft mandates the use of “non-toxic” and “phosphate free” biodegradable cleaners and detergents during deck washdowns or above water line hull cleaning. The SAFECARE® cleaners and degreasers now offered by Terresolve are non-hazardous, readily biodegradable and are compliant with these regulations.

“SAFECARE® cleaning solutions from RSC Bio Solutions have been meeting and exceeding industrial-grade cleaning demands for years,” said Mark Miller, Executive VP of the combined RSC Bio Solutions / Terresolve Technologies businesses. “Joining forces with RSC Bio Solutions gives us the unique opportunity to bring further value to our marine and offshore industry customers by giving them direct access to these highly effective and readily biodegradable solvents, cleaners and degreasers, as we have done for 17 years with readily biodegradable ENVIROLOGIC® lubricants. We look forward to helping customers in these industries comply with the EPA’s upcoming regulation changes by providing them with exceptional, safe cleaning solutions.”

The SAFECARE® line of cleaning solutions comes in a variety of forms, from ready-to-use products in spray bottles to concentrate and custom formulations in bulk quantities. For more

information on SAFECARE® readily biodegradable products for the marine and offshore industry, please call 1-800-661-3558, or e-mail [info@terresolve.com](mailto:info@terresolve.com).

**About RSC Bio Solutions, LLC**

Established in 2010 and headquartered in North Carolina, RSC Bio Solutions is a sister corporation to Radiator Specialty Company (RSC) focused on providing high performance chemistries that are safe, non-hazardous and environmentally responsible. To expand its offerings further, RSC Bio Solutions' parent company, Blumenthal Holdings, recently acquired a controlling interest in partner Terresolve Technologies and its ENVIROLOGIC® product lines, including readily biodegradable functional fluids and gear oils that are tested and proven in some of the toughest environments possible. For more information, visit [www.rscbio.com](http://www.rscbio.com).

**About Terresolve Technologies, LTD**

Founded in 1996 and based in Ohio, Terresolve Technologies is dedicated to providing non-toxic, biodegradable lubricating products that deliver exceptional performance. With more than 50 different applications, the Terresolve ENVIROLOGIC® products have been tested and used in some of the toughest environments possible. For more information, contact Terresolve Technologies; 9609 Jackson St., Mentor, Ohio 440-639-8633, [www.terresolve.com](http://www.terresolve.com).
