*** For use with mechanical, manual, or battery/power operated sprayers, follow standard safe handling of materials. For ULV fogger applications, wear safety glasses with side shields or goggles to protect eyes. Face mask (N95) is also recommended for ULV fogger applications. Ultra-low volume (ULV) fogging machines are cold fogging machines that use large volumes of air at low pressures to transform liquid into droplets that are dispersed widely into the atmosphere surrounding the applicator, so proper eyewear and a mask is recommended for ULV fogger application.
